FEBRUARY UPDATE

Hello Everyone,

The Hydro tank is in and operating properly. We have had the filters cleaned and adjusted but we still have yellowish water. We have tried a few things on our own, but it hasn't helped. We have put another call into Central Water, and they are going to come out and figure it out. We are aware of the situation and are actively trying to rectify it.

The sinking asphalt on the cow path cul-de-sac is being addressed. We have called for a utility locate. We will do an exploratory dig to find out exactly what is going on. We will order material and do the main dig when it arrives. We will have to rent a larger backhoe to do the job. Ours will be fine for the first stage.

We are getting quotes for seal coating and stripping of the roads.

We are also investigating replacing tile and possibly the coating on the pool. They are 23 years old and have a life expectancy of 7-10 years.

The Lake Committee did a lake clean up yesterday, February 29, 2024. We appreciate their hard work. We need to address our rapidly disappearing shoreline, and we are looking at options.

Lon & Laura Sloan have been working on the P.A. system and have gotten it working. We had allotted \$1,000.00 to repair it and they have got it going for a lot less. Thanks to them.

As we are writing this it is March 1st, some of us will be leaving soon. As a reminder you will all be getting a notice about tree trimming, putting things away, etc. Hint- that may be the next round of violations.

We are making our summertime work to do list. If there are suggestions of things we may not think of, write it down and let the office know.

We had a COVID scare but we will get through it. We want to thank everyone for their cooperation. Thanks to the Fun Club for jumping in and helping with the situation.

Well, until next month, let's have fun and be safe.

Board of Directors
